

Can delivery of a Digital Media Technology ePortfolio, help Bridge the gap between Community Education and further education, training and employment, from a tutor and student perspective?

Tutors questions

1. Are the IT resources in your centre adequate to allow use of teaching technology such as ePortfolios?
2. Have you been adequately trained in the use of teaching technology such as ePortfolios?
3. If resources and training were and training were adequate to allow this, do you think that the use of ePortfolios would complement you're teaching style well?
4. Do you believe that technology such as ePortfolios are more use in some subject areas than in others?
5. If these technologies and resources were available, do you think they would enhance student performance?
6. In what skill areas would students benefit most?
7. Would students be better prepared for further education, work placement, internships and employment if they had been making use of this technology during community education?
8. To what extent would it benefit or improve your professional practice?
